SUPREME 4D

TIME CONTROL PROGRAM

SUPREME 4D

TIME CONTROL PROGRAM

CONTEXT

The growing demand for multi-functional anti-aging products is closely linked to an increased customer awareness and interest in global rejuvenating solutions and cosmetic innovations.

When it comes to formulas, naturality is highly appreciated, but efficacy remains the main purchase driver for anti-aging cosmetics and sensoriality the key to customer loyalty.

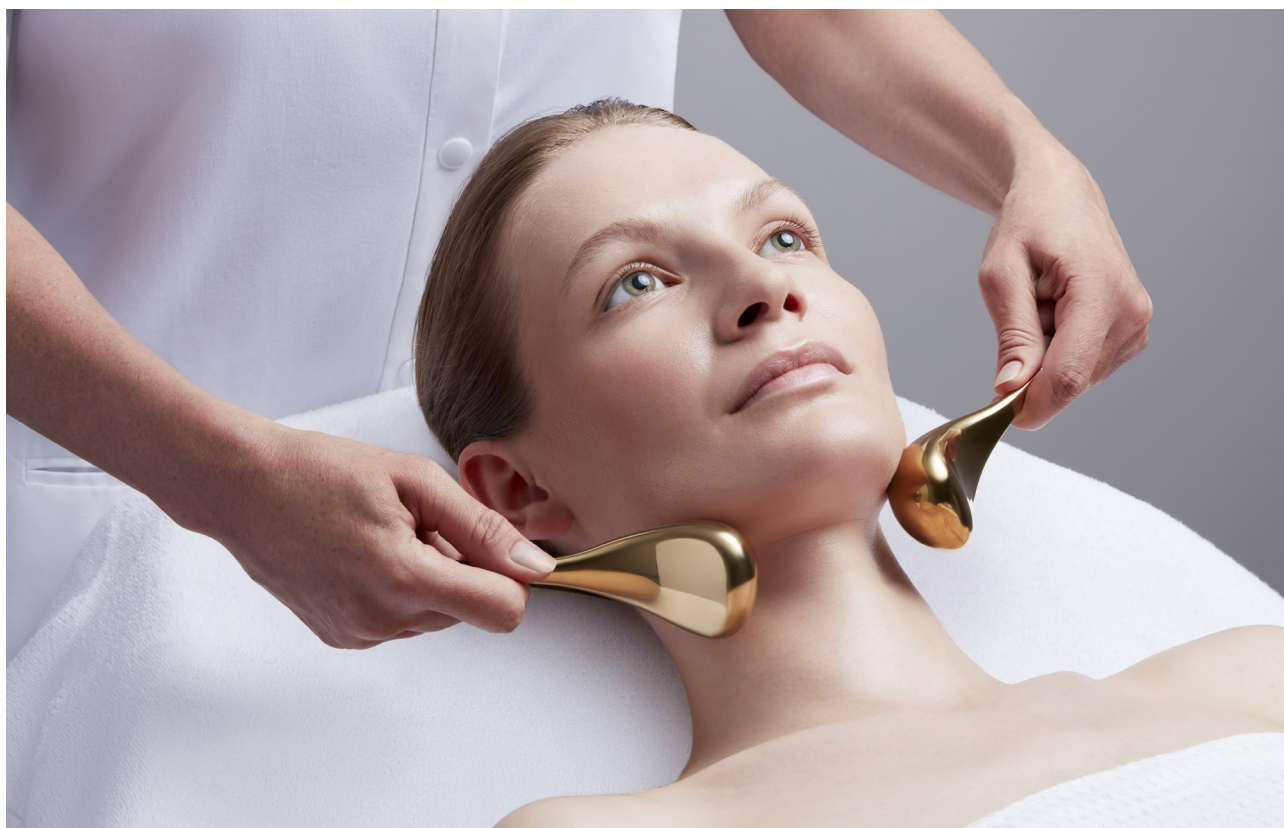

This has led ERICSON LABORATOIRE to design a new science driven and nature empowered global anti-aging skincare range and professional protocol.

CONCEPT

With SUPREME 4D, ERICSON LABORATOIRE introduces an exceptional regenerating skincare range designed to act simultaneously on the 4 dimensions of skin aging: loss of substance, sagging skin, discolorations, and chronic weakening of the hydrolipidic barrier. The formulas integrate a "cellular reactivator" complex designed to reproduce the regenerating effects of Retinol and compensate for the structural and functional deficiencies of mature skin. SUPREME 4D offers the skin an exceptional vitality and the radiance of a new youth.

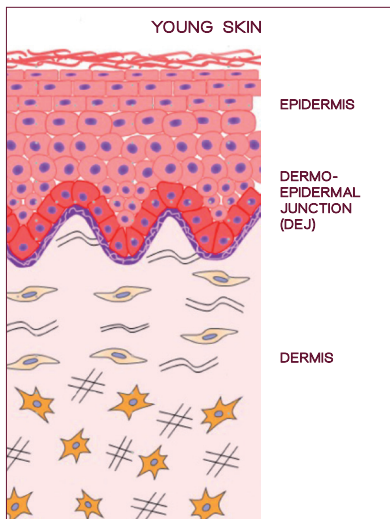

LAUNCH OBJECTIVES

- Develop our anti-aging expert category with an exclusive, more premium skincare offer for mature and/or depleted skin types.
- Target demanding customers expecting a multi-benefit age-defying skincare products and salon treatments designed to address all signs of aging while providing superb comfort.
- Offer exceptionally concentrated, efficient and sensorial anti-aging formulas inspired by researches in regenerative medicine and fueled by the latest cell-regenerating cosmeceutical bio-technologies.

SKIN PHYSIOLOGY

1. THE THREE SKIN COMPARTMENTS

EPIDERMIS

- **Outer protective layer of the skin** (physical barrier to outer aggression + TEWL: water evaporation)
- Consists mainly of **Keratinocytes**, Melanocytes (produce pigment), Langerhans cells (provide immune protection) and Merkel cells (touch receptor)
- Keratinocytes formed in the basal layer **evolve and migrate to the top layer** where they die and shed ensuring the epidermal turnover process.

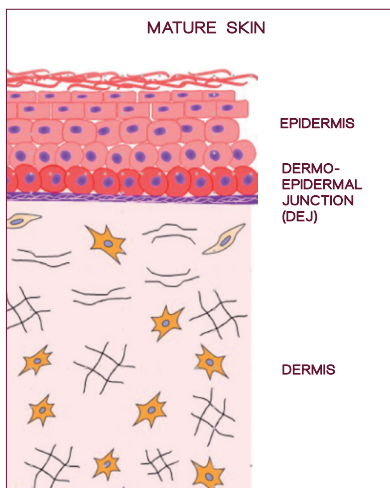

DERMO-EPIDERMAL JUNCTION

- Thin layer of membranes (50 to 80 nm) ensures **skin cohesion**
- Acts as a **substrate for adhesion and migration of keratinocytes** on epidermis side
- On the dermis side, its anchoring collagen IV fibrils and glycoproteins ensure the **bond with the papillary dermis**
- Ensures proper **molecular and cellular exchanges** between the two compartments

DERMIS

- Connective tissue matrix made up mainly of **fibroblast cells in a collagen, elastin and fibrillin rich matrix** (the Extra-Cellular Matrix or ECM)
- Gives the skin most of its substance and **dynamic structure**
- Also integrates blood vessels, nerves, gland and hair follicles.

2. OVERALL AGING IMPACT IN THE 3 COMPARTMENTS

EPIDERMIS

- **Epidermal renewal rate decreases -50%** between the ages of 20 and 70
- **Thinning of the epidermis** due to flattening and decrease of keratinocytes
- Barrier function permeability ("building blocks" structure disruption + reduced lipid "cement" production)
- **Melanocytes impairment**

DERMO-EPIDERMAL JUNCTION

- The dermo-epidermal junction **loses its undulations**
- **Collagen VII production** in particular drops sharply.
- At the molecular level: **decreased expression of DEJ proteins**

DERMIS

- **Dermal atrophy** as fibroblast number cell decrease and synthesize less structural proteins
- **Proteoglycans deteriorate** (loss of hyaluronic acid)
- Advanced **glycation end products (AGEs)** and **collagen cross-link**
- MMP accelerates **collagen fragmentation** and disorganization
- **Elastin fiber** becomes thinner and **lose their biological properties.**

3. MATURE SKIN SPECIFICITIES

EPIDERMIS

MALFUNCTIONS

- Slower keratinocyte turnover (stratum corneum renewal takes twice as long for mature skin).
- Uneven synthesis and distribution of melanin.
- Barrier function becomes more permeable due to post-menopause ceramide drop and pH variation.

CONSEQUENCES

- Dull and sallow skin.
- Pigmentation disorders.
- Chronic dryness: approx. -30% lipids.

DEJ

MALFUNCTIONS

- Impaired cohesion between the epidermal and dermal layers.
- Accelerated DEJ flattening decreases the dermo-epidermal cellular exchange surface and prevents proper cell signaling.

CONSEQUENCES

- Lower bio-mechanical resistance.

DERMIS

MALFUNCTIONS

- Decrease of fibroblasts and lower fiber quality production.
- Collagen loss (-30% collagen in the 5 years post menopause).
- Hormone-induced decrease of GAG production and elastin fragmentation.
- Lower capillary flow.

CONSEQUENCES

- Loss of resistance and elasticity.
- Increased skin laxity leading to accelerated wrinkle formation.
- Complexion loses its rosy tone.

SUPREME 4D: THE RANGE UNIQUENESS

Act on the 4 key parameters of skin aging for a 4D youth effect.

1. LOSS OF SUBSTANCE & IMPAIRED STRUCTURE

2. DECREASED FIRMNESS & SKIN SAGGING

3. DISCOLORATION & UNEVEN SALLOW TONE

4. WEAKER HYDROLIPIDIC BARRIER

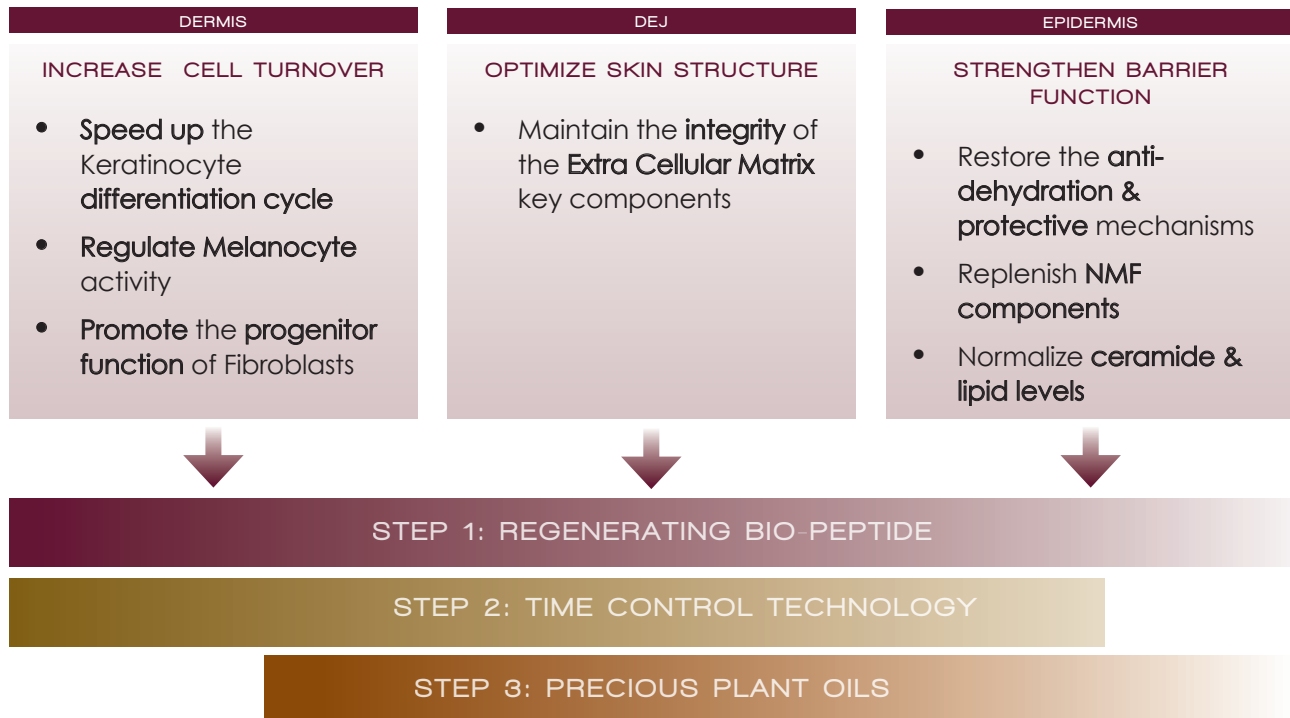

SUPREME 4D target the 3 skin compartments by:

- Promoting extra-cellular matrix regeneration (dermis)
- Stimulating cellular communication (DEJ)
- Compensating age-related lipid/ceramides loss (epidermis)

THE SUPREME 4D TECHNOLOGY

SUPREME 4D is a global anti-aging range designed as a true cellular youth prolongator.

It incorporates an innovative technology combining the best of cellular biology and nature's regenerative powers. This multi-functional and cross-functional approach targets the skin's 3 compartments for a global anti-aging effect:

The SUPREME 4D innovative technology is based on a selection of active principles designed to offer a 3 complementary steps approach to youth recovery.

1. REGENERATING BIO-PEPTIDE

Offers benefits similar to those of retinol, but more adapted to the thinness and sensitivity of mature skin types.

2. TIME CONTROL TECHNOLOGY

Consists in a complex of age-repair glycans combined with a "lifting" glycopolymer for an instantly visible and lasting youth effect.

3. PRECIOUS PLANT OILS

Expert selection of precious oils renowned for their revitalizing, nourishing and protective properties.

1. REGENERATIVE BIO-PEPTIDE

A BIO-PEPTIDE ALTERNATIVE TO RETINOL

Retinol is anti-aging dermatological staple which targets the 4 key signs of aging: Loss of substance, decrease in elasticity, pigmentation-related disorders, and thinner & weaker skin.

It works **throughout the 3 skin compartments**:

- However, retinol and its derivatives can present **irritating side effects**.
- If it is tolerated relatively well on thick, oily skin, it is not the case on **mature skin, which is naturally finer** and dryer.

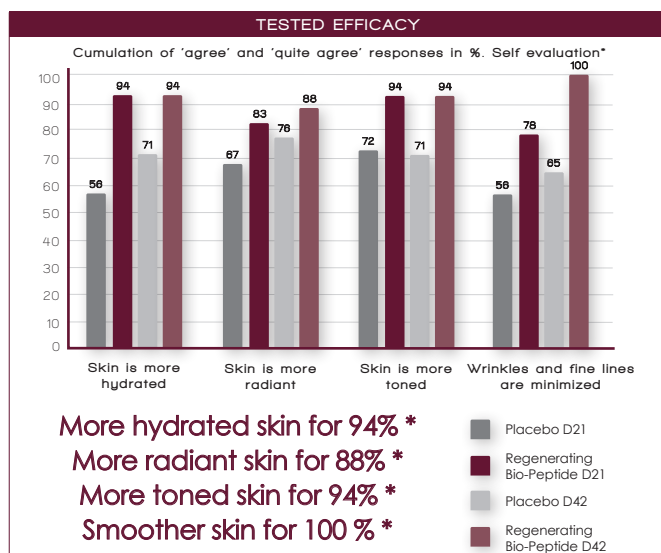

This led ERICSON LABORATOIRE to look for molecules presenting biological properties identical to those of retinol but without the side effects.

The REGENERATING BIO-PEPTIDE COMPLEX offers a **retinol-like action** that stimulates **transverse biological activity in all 3 skin compartments** for a rapid, powerful anti-aging action:

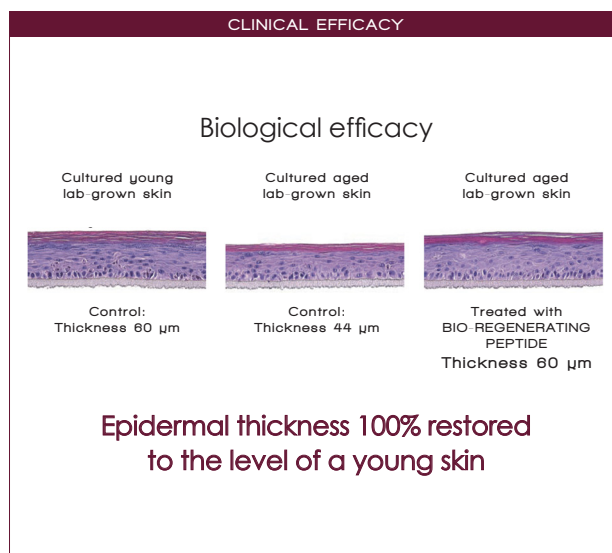

- Its exceptional anti-aging properties **similar to those of retinol but with high skin tolerance**.
- Acting as a **matrix remodeling agent** and **barrier function booster**, this multi-benefit active ingredient offers a **transversal action on a variety of cutaneous biological targets** for an overall regenerating efficacy.

It is extracted from sustainably sourced cranberries and is made up of **bio-peptides comprising several amino acids** particularly rich in **arginine**.

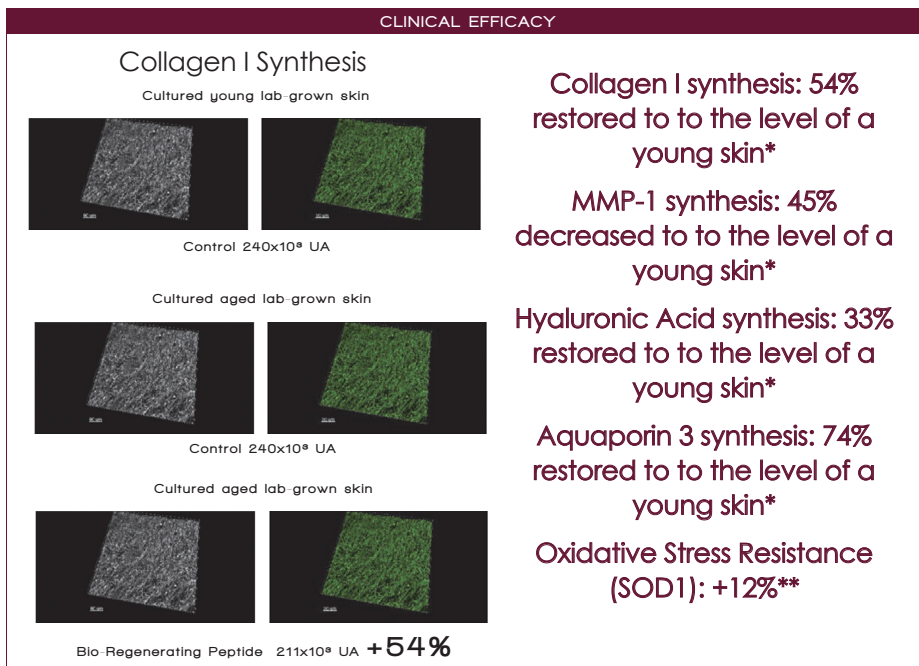

DERMIS	DEJ	EPIDERMIS
<p>INCREASE CELL TURNOVER</p> <ul style="list-style-type: none"> • Stimulates fibroblast density & structural protein production: Collagen I & III, Elastin • Increases Hyaluronic acid content in the ECM • Eases collagen crosslinking • Protects ECM components against MMP and AGE • Minimizes Inflammatory responses 	<p>OPTIMIZE SKIN STRUCTURE</p> <ul style="list-style-type: none"> • Boosts the synthesis of the key DEJ proteins: Collagen IV, VII and Laminin • Restores the undulations of the DEJ structure 	<p>STRENGTHEN BARRIER FUNCTION</p> <ul style="list-style-type: none"> • Optimizes the keratinocytes differentiation process • Restores epidermal cohesion & thickness • Promotes a youthful rosy-glow and limits uneven pigmentation • Improves hydration & oxidative stress resistance

* Self-evaluation on 32 subjects of the Regenerating Bio-Peptide performance after 21 and 42 days and following twice-daily application of a formula containing 2% Regenerating Bio-Peptide.

* 14-day in-vitro test performed on aged fibroblasts in a culture medium containing 0.5% Regenerating Bio-Peptide.

None of the subjects in the group testing the formula containing the Regenerating Bio-peptide showed symptoms of irritation after 21 days, compared to 33% in the group testing the formula containing 0.075% retinol.

* 14-day in-vitro test performed on aged fibroblasts in a culture medium containing 0,1% Regenerating Bio-Peptide.

** Comparative analysis on reversed transcribed ARN of aged and young cells after 48 hour ex-vivo test on extracted cells incubated at 37° in a culture medium containing 0,1% Regenerating Bio-Peptide.

2. "TIME-CONTROL" TECHNOLOGY

INSPIRED BY GLYCOBIOLOGY: A NEW FRONTIER IN SKIN SCIENCE

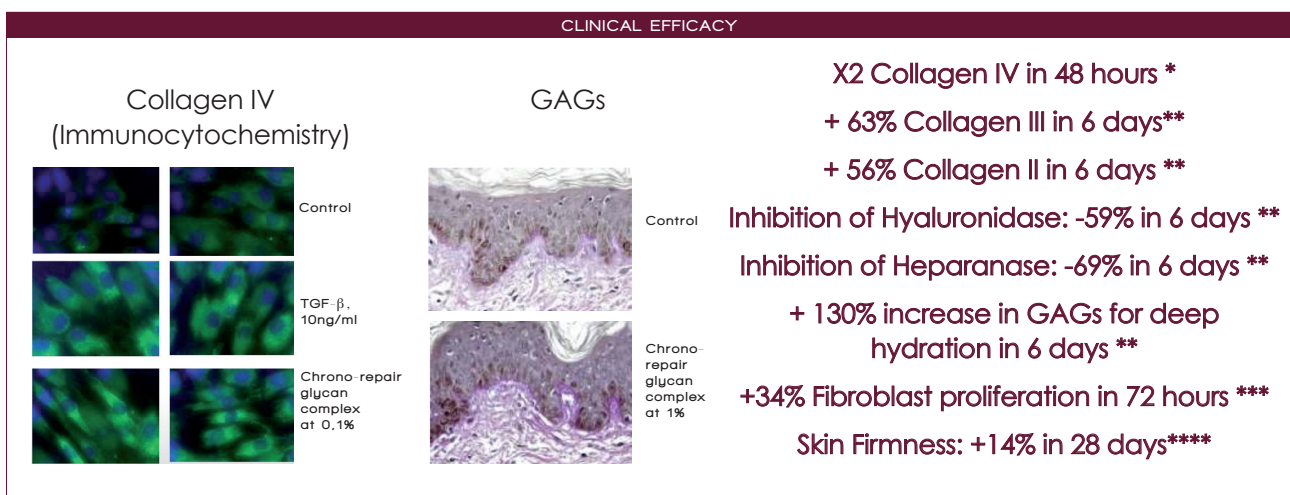

Based on the latest discoveries in glycobiology, ERICSON LABORATOIRE has selected active ingredients rich in glycans, complex sugars present on skin cells interact with specific receptors on the surface of different cutaneous cell types, and a high efficacy glycopolymer.

A. CHRONO-REPAIR GLYCAN COMPLEX

SUPREME 4D contains a high concentration of oligosaccharides, a form of glycan with excellent skin-regenerating properties. These glycans are essential for the transmission of biological messages key to maintaining skin homeostasis and to the processes of cell synthesis, proliferation and differentiation.

They have proven to be particularly active on key targets involved in tissue restructuring and the prevention of skin aging. They perfectly complement the action of the regenerating Bio-Peptide for increased efficacy on cell renewal and skin structure.

The active ingredient used comes from a hydrolyzed flaxseed extract particularly rich in xylose, galactose, glucose & rhamnose monomers which are renowned for their ability to support the reactivation of cellular communication and skin regeneration mechanisms.

* In-vitro test performed on cells in a culture medium containing 0.1% chrono-repair glycan complex.

** Biopsy test on 1 44-year-old subject in a culture medium containing 1% chrono-repair glycan complex after 6 days

*** Monolayer cultures of normal human dermal fibroblasts. Incubation during 72h in a culture medium containing 0.1% chrono-repair glycan complex.

**** Volume of skin depression improvement measured on 22 subjects after a twice daily application for 28 days of a formula containing 1% chrono-repair glycan complex.

B. "LIFT-EFFECT" GLYCOPOLYMER

Polymers are macromolecules found in numerous cosmetic products, as they possess remarkable and unrivalled in terms of rheology, sensoriality and stability. The mechanical "tensing" properties of "lift-effect" formulas are often obtained using polymers.

The glycopolymer in SUPREME 4D consists is natural plant-sugar based second-skin film which has been designed based on a **novel IBPN (Interpenetrating Bio-polymer Network) technology**.

It is advanced network of **two interpenetrating biopolymers**:

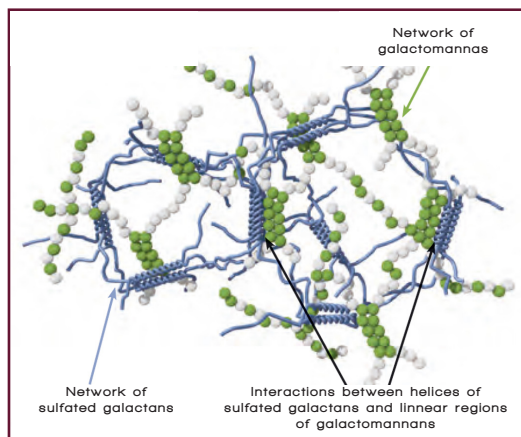

- **Galactomannans** of *Caesalpinia spinosa*, an extremophile shrub
- **Sulfated galactans** of *Kappaphycus alvarezii*, a warm water algae

Its production process excludes exogenous chemicals.

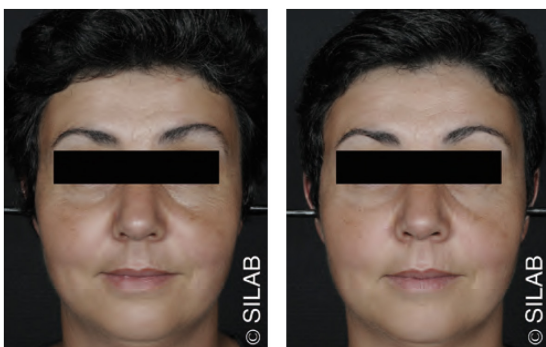

This innovative process allows the creation of a dense, tightly woven mesh structure, with a powerful shrink force, excellent sensory efficiency and high resistance.

The network structure provides both outstanding biomechanical properties and superior film-forming capacities compared to those resulting from a simple mixture of individual biopolymers, and also offer supports the skin's barrier function:

- Instant tensor effect as of the first application
- Smoothens the skin's micro-relief and minimizes pore visibility
- Helps restore the cutaneous barrier by recreating cellular cohesion in the epidermal stratum corneum. It acts as a cellular cement, binding cells together. Water loss is limited, guaranteeing optimal hydration and moisture balance.

TESTED EFFICACY

Rapid visible effect on global attractiveness of the face perceived by untrained evaluators.

*Photo taken after 3 x 50 min application of a mask containing 0.5% "lift-effect" glycopolymer over 7 days.

3. PRECIOUS PLANT OILS

Essential fatty acids, such as omega-3 (alpha-linolenic acid) and omega-6 (linoleic acid), are considered essential because they are not synthesized by the skin. They are only supplied by our diet or topically through cosmetic formulas. Essential Fatty Acids are key to:

- Maintain cell membrane integrity and ensure optimal cellular exchanges
- Reinforce the skin's lipid barrier, making it more resistant to external aggressions.
- Promote skin healing thanks to their anti-inflammatory properties
- Contribute to a more elastic, supple and luminous skin.

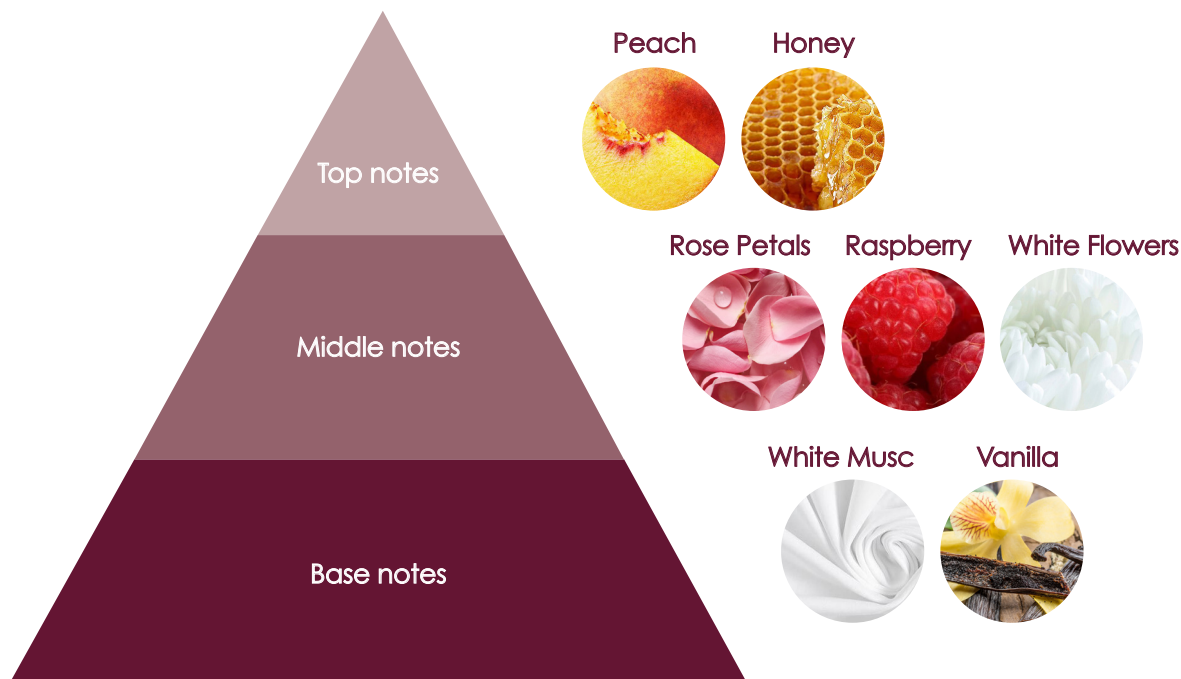

The natural oils used in SUPREME 4D have been extracted from **3 plants selected for their very rich fatty acids, vitamins** (notably tocopherol or vitamin E), polyphenols and minerals content.

They have a **high affinity with the skin** and are also easily absorbed by the phospholipids in cell membranes to help **reinforce the skin's hydrolipidic layer and stabilize sebum production**.

ROSEHIP OIL	CAMELIA OIL	MARULA OIL
 <p>A mature skin favorite: rich in essential fatty acids, vitamins A, C & E, it stimulates ceramide production and offers anti aging, anti-oxidant & anti-inflammatory benefits</p>	 <p>Contains vitamins A, B, and E, minerals and omega 3, 6, and 9. Its 85% concentration in oleic acid makes it a powerful soothing and replenishing ingredient</p>	 <p>Rich in 3, 6, and 9 and Vit C & E, its high linoleic acid (a ceramides component). It preserves skin lipidic balance, promotes radiance and protects from free-radicals</p>

FRAGRANCE

An elegant, sophisticated fragrance to ensure the product application is always a pleasurable and voluptuous moment.

TECHNOLOGY HIGHLIGHTS

SUPREME 4D's technology is a unique combination offers complementary benefits targeting all 3 skin compartments (dermis, DEJ and epidermis) for a lasting global anti-aging efficacy.

			DERMIS LEVEL	DEJ LEVEL	EPIDERMAL LEVEL
			Stimulate cellular renewal	Optimize the cutaneous structure	Strengthen the barrier function
Technology	Active Principles	Objectives	Benefits		
STEP 1: REGENERATING BIO-PEPTIDE	Innovative naturally derived "retinol-like" bio-peptide	Stimulate cellular renewal Optimize the cutaneous structure Strengthen the barrier function	Stimulates fibroblast Promotes structural protein production Increases HA content Protects ECM components	Boosts the synthesis of the key DEJ proteins Restores the undulations of the DEJ	Restores epidermal cohesion & thickness Promotes a youthful rosy-glow Limits uneven pigmentation Improves hydration & oxidative stress resistance
STEP 2: TIME CONTROL TECHNOLOGY	Glycan Complex + "Lift Effect" glycopolymer	Stimulate cellular renewal Optimize the cutaneous structure	Minimizes Inflammatory responses	Increases collagen IV production	
STEP 3: PRECIOUS PLANT OILS	Selection of fatty-acid rich natural oils	Optimize the cutaneous structure Strengthen the barrier function		Improves skin elasticity	Stimulates ceramide production Restores hydro-lipidic balance Promotes radiance Protects from free-radicals

THE SUPREME 4D PROFESSIONAL TREATMENT

This exclusive skincare protocol is designed for a demanding clientele seeking a multi-benefit anti-aging care protocol, SUPREME 4D treats all signs of aging while offering exceptional comfort and sensoriality.

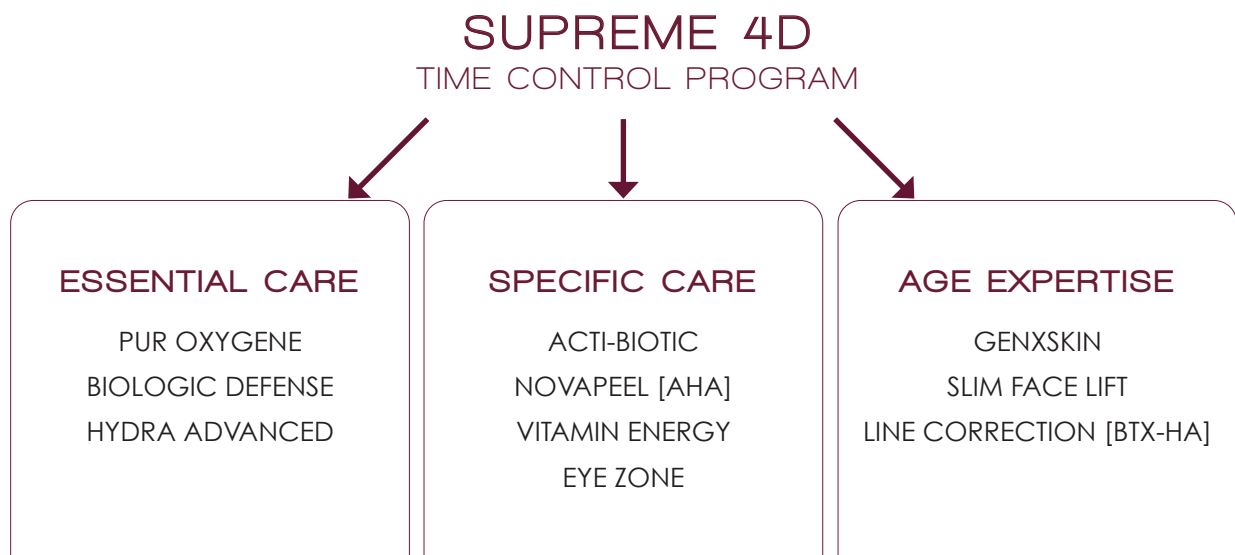

The protocol also includes the use of cryo-therapy spoons to enhance the toning and firming effects of the massage and deeply relax the face to ease all tensions.

The result : The skin feels visbly firmer, smoother and radiates youth.

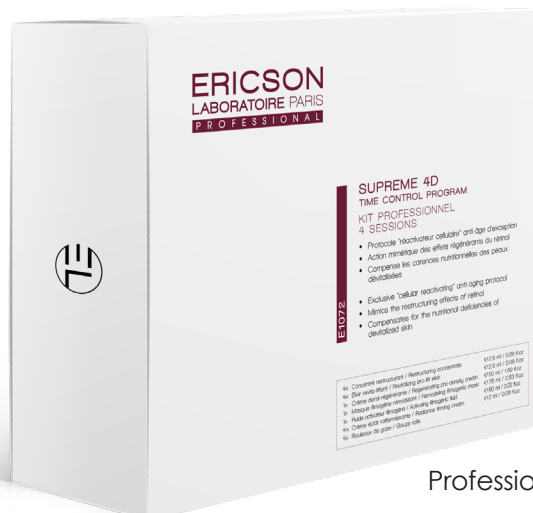

Particularly recommended for women over 45, the range offers high-nutrition textures equally suited to fragile, depleted younger skin types with hydro-lipidic deficiencies. It combines premium formulas and an innovative massage technique to tone the epidermis and support cell regeneration.

It can easily be integrated within a Multi-therapy program:

- Combined with targeted anti-wrinkle or lifting and reshaping protocols designed for specific accentuated aging concerns.
- After a peeling or energizing protocol to potentialize its efficacy on very dull and fatigued skin.
- After a moisturizing or rebalancing protocol if skin presents significant dehydration or sensitivity.

It is important bear in mind that the skin is an entity that intervenes in connection with numerous physiological parameters. It is therefore essential to logically design the various multi-therapy steps required to establish a personalized treatment for the customer, in order to achieve the desired results.

THE SUPREME 4D PROFESSIONAL TOOLS

Inspired by the benefits of cryotherapy, the cryo-massage spoons contain a cooling gel that keeps them fresh throughout the massage session. Their ergonomic design allows them to perfectly follow the face contours for an exceptional remodeling massage that firms, tones and reshapes.

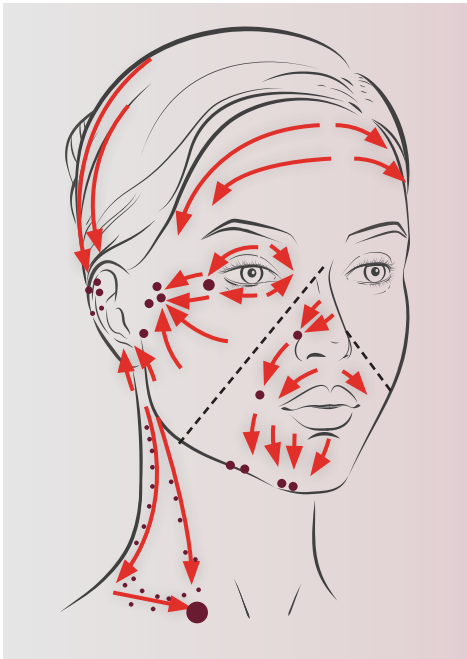

The cold effect helps:

- **Tone the skin**
- **Activate micro-circulation for an immediate revitalizing effect**
- **Obtain an instant "lift" effect and visibly reshape facial contours**
- **Stimulate skin regeneration by increasing cellular metabolism, notably collagen and elastin production**

How to use:

- Place the cryo-massage spoons in the refrigerator's ice cube tray at least two hours before a professional protocol. Take them out 10 minutes before application.
- The cold spoon massage consists in 2 complementary phases:
 1. Preparatory draining phase
 2. Toning and remodeling massage phase
- Refer to the professional video for more details the different steps of the massage techniques.

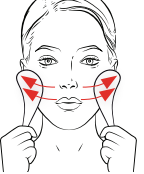

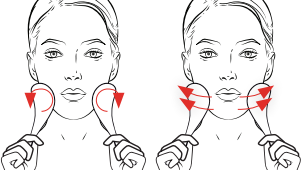

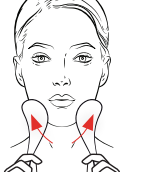

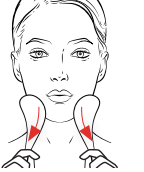

CRYO-MASSAGE STEP 1: LYMPHATIC DRAINAGE

- Initiate massage by stimulating the lymph nodes in the clavicle area.
- Apply slow, even pressure by tilting the 2 CRYO-MASSAGE SPOONS forward, repeating the movement 7 to 10 times: sub-clavicular lymph nodes.
- Move the 2 spoons to the base of the neck under the earlobes and repeat the slow, even pressure. 7 to 10 times: maxillary angle nodes.
- Again, move the 2 SPOONS on either side of the face towards the ears with the same rocking motion. 7 to 10 times: parotid lymph nodes.
- Start the massage by positioning the 2 CRYO-MASSAGE SPOONS at the base of the neck, level with the collarbones.
- Move the 2 CRYO-MASSAGE SPOONS gently downwards to follow the path of the lymphatic circuit.
- Using the side of the 2 CRYO-MASSAGE SPOONS, continue draining the middle part of the face, starting with the chin, then the upper lip and nose, directing lymph towards the submental lymph nodes.
- Continue the massage over the cheeks, starting from the ears and moving inwards towards the face, returning to the parotid lymph nodes, then continue over the forehead to the ears.
- Finish with downward strokes on the side of the face, pressing lightly on the lymph nodes.

CRYO-MASSAGE STEP 2: RESHAPING & FIRMING MASSAGE

Inspired by the benefits of cryotherapy, the cryo-massage spoons contain a cooling gel that keeps them fresh throughout the massage session. Their ergonomic design allows them to perfectly follow the face contours for an exceptional remodeling massage that firms, tones and reshapes.

1		Start by placing the spoons in the center of the forehead, then slide them towards the temples.
2		Place the edge of the spoons between the eyebrows, then slide them along the brow bone towards the temples.
3		Place the tips of the spoons on the inner corner of the eye, applying very light pressure, and leave them on the eyelids for a few seconds, before sliding them towards the temples.
4		Place the spoons at the top of the sides of the nose, then slide them towards the temples, keeping the tools under the cheekbones.
5		Place the spoons at the corners of the mouth and use gentle circular movements to reduce tension in the jaws. Slide the spoons towards the ears.
6		Place the spoons in the center of the chin and slide them towards the earlobes, following the lower jawbone.
7		Place the spoons under the chin and slide them towards the earlobes, keeping the spoons behind the lower jawbone.
8		Finish the massage by sliding the spoons along the neck towards the collarbones for a draining action.

After use, rinse the Cryo-massage spoons with soap and water, dry well and finalize cleaning with a cotton pad soaked in alcohol or antiseptic. Store them back in their plastic case and replace them in the refrigerator.

THE SUPREME 4D PROFESSIONAL PROTOCOL

Designed for a demanding clientele seeking a multi-benefit anti-aging care treatment, SUPREME 4D treats all signs of aging while offering exceptional comfort and sensoriality. Particularly recommended for women over 45, the range offers high-nutrition textures equally suited to fragile, depleted younger skin types with hydro-lipidic deficiencies.

<p>11</p>		<p>CREAM APPLICATION</p> <p>Apply the sachet of RADIANCE FIRMING CREAM E1078 to the entire face and neck with gentle strokes.</p>	 <p>2 min.</p>

4 SESSION TREATMENT

TREATMENT LENGTH:
75 MINUTES

TREATMENT FREQUENCY:
ONCE A WEEK

RESTRUCTURING CONCENTRATE

This lightweight yet deeply replenishing concentrate infuses the skin with a potent combination of youth-boosting active ingredients.

BENEFITS & RECOMMENDATION

- Professional regenerating essence formulated with a high concentration of skin smoothing, firming and elasticity boosting active ingredients.
- Acts as a cellular vitality booster at the start of the protocol.

DIRECTIONS FOR USE

- **Professional use:** apply the entire vial of RESTRUCTURING CONCENTRATE E1073 on the face and neck, proceed to a gentle massage until complete absorption. Refer to professional protocol.

ACTIVE INGREDIENTS

- **Regenerating bio-peptide:** global anti-aging properties identical to those of retinol
- **Chrono-repair glycan complex:** regenerating and skin-restructuring action
- **Hyaluronic acid:** plumping and densifying
- **Cranberry water:** moisturizing, soothing, and nourishing thanks to its high content in essential nutrients and trace elements
- **Prickly pear extract:** anti-oxidant and moisturizing

PRESENTATION

- **Retail:** not available.
- **Professional use:** 4 x 2.5 ml vial – Ref. E1073 included in the E1072 4 session kit.

PRO USE
E1073

REVITALIZING PRO-LIFT ELIXIR

This high potency anti-aging formula offers a visible smoothing and toning effect upon application. Day after day, it supports the cellular functions essential to a younger-looking, denser and more luminous skin.

BENEFITS & RECOMMENDATION

- Silky tightening serum offering an instant sculpting effect. Day after day, it helps firm tissues and reshape features for a long-lasting skin revitalization.
- Recommended for all skin types.

DIRECTIONS FOR USE

- **At home:** apply over the entire face and neck morning and/or evening with a gentle massage prior to the recommended moisturizing cream, on perfectly cleansed skin.
- **Professional use:** apply after rinsing-off the mask on the face and neck and gently massage until complete absorption. Refer to professional protocol.

ACTIVE INGREDIENTS

- **Regenerating bio-peptide:** global anti-aging properties identical to those of retinol
- **Chrono-repair glycan complex:** regenerating and skin-restructuring action
- **Hyaluronic acid:** plumping and densifying
- **Film-forming glycopolymer:** immediate "lift" effect
- **Ginseng root extract:** firming and glow boosting
- **Rosehip oil:** antioxidant, rich in anti-aging essential fatty acids and brightening thanks to its naturally high tretinoin (trans retinoic acid) content

PRESENTATION

- **Retail:** 30 ml pump bottle – Ref. E1079.
- **Professional use:** 4 x 2.5 ml sachet – Ref. E1074 included in the E1072 4 session kit.

E1074

TONING PRO-LIFT CREAM

The perfect cream for women who are looking for a shine-free texture to address their anti-aging needs. Replenishing yet lightweight and non-greasy, it also offers a soft "lift" effect upon application.

BENEFITS & RECOMMENDATION

- Light and melting revitalizing cream for an instant reshaping and energizing feeling. Day after day, it helps tone and brighten the skin for a visible anti-sagging effect, minimized wrinkles and a youthful luminosity.
- Recommended for dehydrated skin prone to shine.

DIRECTIONS FOR USE

- **At home:** apply as a day and/or night cream, either by itself or after the recommended serum.

ACTIVE INGREDIENTS

- **Regenerating bio-peptide:** global anti-aging properties identical to those of retinol
- **Chrono-repair glycan complex:** regenerating and skin-restructuring action
- **Hyaluronic acid:** plumping and densifying
- **Film-forming glycopolymer:** immediate "lift" effect
- **Camelina oil:** rich in anti-inflammatory omega-3, vitamin E, and anti-oxidant phytosterols

PRESENTATION

- **Retail:** 50 ml jar – Ref. E1080.
- **Professional use:** not available.

RADIANCE FIRMING CREAM

Its lipid-rich texture absorbs quickly into the skin and leaves the skin looking smoother, plumper and glowing. It gradually improves skin firmness and density for a more youthful look while ensuring lasting anti-aging protection.

BENEFITS & RECOMMENDATION

- Velvety firming and comforting cream with a visible action on skin elasticity and uniformity. Day after day, it reinforces the skin's support structure for increased elasticity and helps it recover a youthful glow.
- Recommended for dry skin types.

DIRECTIONS FOR USE

- **At home:** apply as a day and/or night cream, either by itself or after the recommended serum.
- **Professional use:** apply to the entire face and neck with gentle strokes at the end of the professional treatment. Refer to professional protocol.

ACTIVE INGREDIENTS

- **Regenerating bio-peptide:** global anti-aging properties identical to those of retinol
- **Chrono-repair glycan complex:** regenerating and skin-restructuring action
- **Hyaluronic acid:** plumping and densifying
- **Marula oil:** moisture-sealing, brightening and anti-inflaming properties thanks to its high omega 6 and 9 fatty acid content
- **Shea Butter:** rich in antioxidant vitamins and ceramides to help restore the hydro-lipidic film

PRESENTATION

- **Retail:** 50 ml jar – Ref. E1081.
- **Professional use:** 4 x 2 ml sachet – Ref. E1078 included in the E1072 4 session kit.

PRO USE
E1078

REGENERATING PRO-DENSITY CREAM

Ultra-generous and rich texture packed with regenerating active ingredients and oleo-extracts to soften and protect the skin. Helps compensate for the lipid deficiencies of mature and very dry skin types.

BENEFITS & RECOMMENDATION

- Rich cream with high concentrations of regenerating active ingredients and lipid-supplementing oleo-extract. Helps restructure, firm and protect the skin. Day after day, the skin feels comforted and regains a firmer and more radiant look.
- Recommended for dry and very dry skin types and/or as a generous night cream.

DIRECTIONS FOR USE

- **At home:** apply as a day and/or night cream, either by itself or after the recommended serum.
- **Professional use:** apply to the entire face and neck, proceed to a revitalizing massage, followed by a remodeling massage with CRYO-MASSAGE SPOONS. To ensure their smooth glide on mature skin needing more nutrition, do not hesitate to reapply more REGENERATING PRO-DENSITY CREAM after the manual massage. Refer to professional protocol.

ACTIVE INGREDIENTS

- **Regenerating bio-peptide:** global anti-aging properties identical to those of retinol
- **Chrono-repair glycan complex:** regenerating and skin-restructuring action
- **Evening primrose oil:** moisture-sealing, anti-oxidant and anti-inflaming due to its high antioxidant, fatty acid and phytosterol content
- **Borage oil:** restores the hydrolipidic film thanks to its high levels of gamma linoleic acid and promotes skin elasticity

PRESENTATION

- **Retail:** 50 ml jar – Ref. E1082.
- **Professional use:** 50 ml tube – Ref. E1075 included in the E1072 4 session kit.

REMODELING FILMOGENIC MASK

Offers a visible reshaping and instant "lift effect" thanks to its second-skin tensing filmogenic technology

BENEFITS & RECOMMENDATION

- This professional mask promotes the absorption of active ingredients and helps stimulate tissue regeneration providing a visible firming effect.

DIRECTIONS FOR USE

- **Professional use:** apply a thick layer of mask, then place the gauze strips with a lifting effect, and cover the gauzes with a second layer of mask. Make sure the 2nd layer of mask completely covers the gauze for proper plasticization upon application of the ACTIVATING FILMOGENIC FLUID. Refer to professional protocol.

ACTIVE INGREDIENTS

- **Film-forming glycopolymer:** immediate "lift" effect
- **Algae and Vegetal gum extract:** provide an occlusive effect to promote the absorption of active ingredients
- **Plant-derived glycerin:** hydrates and softens

PRESENTATION

- **Retail:** not available
- **Professional use:** 75 ml tube – Ref. E1076 included in the E1072 4 session kit.

PRO USE
E1076

ACTIVATING FILMOGENIC FLUID

BENEFITS & RECOMMENDATION

- Combined with REMODELING FILMOGENIC MASK, it enables the mask's plasticization for optimal vectorization of the active ingredients.

DIRECTIONS FOR USE

- **Professional use:** after applying the second layer of REMODELING FILMOGENIC MASK, soak a cotton pad in ACTIVATING FILMOGENIC FLUID and lightly dab the entire surface of the mask for a complementary plasticizing action. Use a protective tissue to prevent the ACTIVATING FILMOGENIC FLUID from dripping onto the client's skin. Refer to professional protocol.

COMPOSITION
